### **training.gov.au - MEM20105 - Certificate II in Engineering**

Modern food industry operation entails sophisticated automation and control architecture. By applying the proven success of modern control technology to most of its operations including food preservation, manufacturing, packaging, and handling, the productivity of food plants can be significantly improved.

### **Trends in food packaging and manufacturing systems and**

You should study simple gear trains to satisfy the course requirements. However, more detailed links have been added below, if you feel there is a need extend your own learning.

### **THE NEW DESIGN AND TECHNOLOGY GCSE**

Stereolithography (SLA or SL; also known as stereolithography apparatus, optical fabrication, photo-solidification, or resin printing) is a form of 3D printing technology used for creating models, prototypes, patterns, and production parts in a layer by layer fashion using photopolymerization, a process by which light causes chains of molecules ...
