I had this problem just last week. I had to serialize a PDF file and send it, inside an XML file, to a server. If you're using .NET, you can convert a binary file directly to a base64 string and stick it inside an XML element.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
