Here Are Some Recommendations to Help You to Decide Whether to Use an Interface or an Abstract Class to Provide Polymorphism for Your Components

2978idx.pdf | Component Object Model | Class (Computer

Firstly, COM is just like object-oriented programming. COM interface is an abstract interface. COM has an advantage over each language's own built-in OOP in that you can have COM classes implemented in different languages and/or compiled by different versions of compilers, and they will still be able to inter-operate.

microsoft - Best place to learn Component Object Model

Specifies the Component Object Model Plus (COM+) Protocol, which consists of a DCOM interface (and DCOM protocol extensions) that is used for adding transactions, implementing synchronization, managing multiple object class configurations, enforcing security, and providing additional functionality and attributes to DCOM-based distributed object ...

[MS-COM]: Component Object Model Plus (COM+) Protocol

The Microsoft® Distributed Component Object Model (DCOM) extends the Component Object Model (COM) to support communication among objects on different computersâ€”on a local area network (LAN), a wide area network (WAN), or even the Internet. With DCOM, your application can be distributed at locations that make the most sense to your customer and to the application. Because DCOM is a seamless ...

DCOM Architecture Page Options - Hadassah

Component Object Model (COM) is a binary-interface standard for software components introduced by Microsoft in 1993. It is used to enable inter-process communication object creation in a large range of programming languages.

Component Object Model - Wikipedia

The Component Object Model (COM) is a software architecture that allows applications to be built from binary software components. COM is the underlying architecture that forms the foundation for higher-level software services, like those provided by OLE. OLE services span various aspects of commonly needed system functionality, including compound documents, custom controls, interapplication ...
