Functions of rural areas and their development . 85. It is different when we assess the benefits of changes from the perspective of an . individual (subjective), form the local, regional and general public perspective

Functions of rural areas and their development

Finding areas by integration mc-TY-areas-2009-1 Integration can be used to calculate areas. In simple cases, the area is given by a single definite integral. But sometimes the integral gives a negative answer which is minus the area, and in more complicated cases the correct answer can be obtained only by splitting the area into several parts and adding or subtracting the appropriate ...
