

fundamentals of thermodynamics sonntag pdf

Overview. In a steady-state, steady-flow process, significant changes in pressure and temperature can occur to the fluid, and yet the process will be isenthalpic if there is no transfer of heat to or from the surroundings, no work done on or by the surroundings, and no change in the kinetic energy of the fluid. (If a steady-state, steady-flow ...

Isenthalpic process - Wikipedia

In thermodynamics, work performed by a system is the energy transferred by the system to its surroundings, that is fully accounted for solely by macroscopic forces exerted on the system by factors external to it, that is to say, factors in its surroundings.
