

### intermetallic compounds vol 4 pdf

The development of visible-light-mediated allylation of unactivated sp<sup>3</sup> C-H bonds is reported. The remote allylation was directed by the amidyl radical, which was generated by photocatalytic fragmentation of a pre-functionalized amide precursor.

### Angewandte Chemie International Edition: Early View

A metalloid is a type of chemical element which has properties in between, or that are a mixture of, those of metals and nonmetals. There is neither a standard definition of a metalloid nor complete agreement on the elements appropriately classified as such.

### Metalloid - Wikipedia

Indium antimonide (InSb) is a crystalline compound made from the elements indium (In) and antimony (Sb). It is a narrow-gap semiconductor material from the III-V group used in infrared detectors, including thermal imaging cameras, FLIR systems, infrared homing missile guidance systems, and in infrared astronomy.

### Indium antimonide - Wikipedia

### Nano Letters (ACS Publications)

Although the calculation of the mixing entropy of an HEA was straightforward when Eqn 1 was used, not only solid solutions but also a large amount of other phases, such as intermetallic compounds and even metallic glasses, were detected at room temperature in the cast HEAs.
