In recent years, except for the discovery of several atypical superconductors, superconductor news has been mainly about novel ways to employ the new generation of ceramic superconductors, innovative fabricating techniques and new PWD (planar weight disparity) superconductors.

news coverage - Superconductor News

Superconductors and superconducting materials are metals, ceramics, organic materials, or heavily doped semiconductors that conduct electricity without resistance. Superconducting materials can transport electrons with no resistance, and hence release no heat, sound, or other energy forms.
